**SIKA® ADDITIVES**

- Provides high early strengths in warm or cold temperatures
- Effective accelerator for cold weather
- Ensures better turn around, stopping of formwork and overcasting
- Does not affect working times

**SIKA® CONCRETE REPAIR MORTARS**

- Strong, cementitious mortar with corrosion inhibitor
- High bond strength
- Excellent tensile and flexural strength
- Can be used as a primer
- High workability
- Easy to apply and handle
- Durability
- Accelerated hardening

**SIKA® FLOWABLE GROUTS**

- High early compressive, tensile and flexural strengths
- Excellent long-term durability
- High bond strength
- Good adhesion
- Excellent workability
- Easy to apply
- Fast setting and high early strengths
- Excellent freeze/thaw and salt scaling resistance
- Excellent abrasion resistance over conventional concrete

**SIKA® PRIMER COATINGS**

- Provides excellent adhesion
- High bond strength
- Excellent resistance to chemical attack
- High water repellent values
- Freeze/thaw resistance
- Excellent bond strength
- Superior abrasion resistance over conventional concrete

**SIKA® SEALING SYSTEMS**

- High bond strength
- Excellent freeze/thaw and salt scaling resistance
- Excellent abrasion resistance over conventional concrete
- High water repellent values
- Freeze/thaw resistance
- Excellent bond strength
- Superior abrasion resistance over conventional concrete

**SIKA® WATER-REPELLENT SEALERS**

- High early compressive, tensile and flexural strengths
- Excellent long-term durability
- High bond strength
- Good adhesion
- Excellent workability
- Easy to apply
- Fast setting and high early strengths
- Excellent freeze/thaw and salt scaling resistance
- Excellent abrasion resistance over conventional concrete

**SIKA® WOOD PROTECTANTS**

- High bond strength
- Excellent freeze/thaw and salt scaling resistance
- Excellent abrasion resistance over conventional concrete
- High water repellent values
- Freeze/thaw resistance
- Excellent bond strength
- Superior abrasion resistance over conventional concrete
