

.....
SAKRETE CONCRETE EXPANSION JOINT
.....

SAKRETE Concrete Expansion Joint replaces outdated asphalt and fibre expansion joints. Designed to help avoid cracking of slabs. Keeps concrete from expanding and pushing against existing walls and slabs.

FEATURES & BENEFITS

- Flexible; will not break or crack when used around curves or columns
- Closed cell construction prevents water absorption
- Resistant to common oils and chemicals due to high quality, non-absorbent polyethylene
- Tear-off strip is included
- Lightweight

USES

Use wherever concrete expansion joints are applicable: slabs, drives, sidewalks, isolation joints and in all standard concrete construction such as highways, runways and parking garages.

READ ALL DIRECTIONS BEFORE STARTING WORK.

ATTENTION: WEAR GLOVES, SAFETY GLASSES AND PROTECTIVE CLOTHING!

PROCEDURES

Placing:

1. Unroll and cut to length needed. One roll is 15.25 m (50') long.
2. Attach to adjacent material (i.e. existing concrete, block, brick) before pouring concrete. Attachment can be made with construction adhesive, nails or staples. Make certain that the top of the expansion joint is at the top of the planned concrete pour.
3. SAKRETE Concrete Expansion Joint comes with a built-in, tear-off strip. Place tear-off strip up if caulking is desired after concrete hardens. Place tear-off strip down if no caulking is planned.
4. Pour concrete and finish. After concrete hardens, if tear-off strip was placed up, remove strip and seal area with suitable caulking.

YIELD

Fills a space approximately 15.25 m (50') x 10 cm (4").

PACKAGING

Rolls, 15 per bag

UPC

764661206507

STORAGE & SHELF LIFE

Store in a tightly closed container, off the floor, in a dry place.

TECHNICAL DATA:

Exceeds standards ASTM D 4819/ASTM D 3575.

SAFETY PROCEDURES

Read and understand the Safety Data Sheet (SDS) before using this product. **WARNING:** Wear protective clothing and equipment. **KEEP OUT OF REACH OF CHILDREN.**
