

PRODUCT DATA SHEET

Sarnastop

ALUMINUM ALLOY BAR

PRODUCT DESCRIPTION

Sarnastop is an aluminum alloy bar used with approved fasteners to clamp Sarnafil® or Sikaplan® membrane to the roof deck, walls, curbs and other details.

Areas of Application

- Base of walls
- Curbs
- Transitions

WHERE TO USE

Sarnastop distributes the loads uniformly across a series of fastening points, maximizing fastener pullout and backout resistance.

CHARACTERISTICS / ADVANTAGES

- Easy to install

PRODUCT INFORMATION

Composition / Manufacturing	Produced from 6063 T6 extruded aluminum alloy with a mill finish. Sarnastop is provided with predrilled holes at 152 mm (6 in) o.c.
Packaging	25 pieces per box, 680 g (1.5 lbs) per piece
Appearance / Colour	Grey
Shelf Life	N/A
Storage Conditions	N/A
Dimensions	Width: 25.4 mm (1 in) Length: 3 m (10 ft) Thickness: 3 mm (0.13 in)

BASIS OF PRODUCT DATA

Product properties are typically averages, obtained under laboratory conditions. Reasonable variations can be expected on-site due to local factors, including environment, preparation, application, curing and test methods.

OTHER DOCUMENTS

Availability

Sarnastop is available directly from Sika Canada Authorized Applicators when used within a Sika® Sarnafil® Roofing or Waterproofing System. Contact Sika Canada or visit our website at www.sika.ca for further information.

Warranty

Upon successful completion of the installed roof by the Sika Authorized Applicator, Sika Canada will provide a warranty to the Building Owner via the Sika Authorized Applicator.

ENVIRONMENT, HEALTH & SAFETY

User must read the most recent corresponding Safety Data Sheets (SDS) before using any products. The SDS provides information and advice on the safe handling, storage and disposal of chemical products and contains physical, ecological, toxicological and other safety-related data.

APPLICATION INSTRUCTIONS

APPLICATION

Sarnastop is positioned over the top of the membrane and fastened to the substrate with approved fasteners. Fastener spacing is determined by Sika technical requirements. The fasteners are set to a depth to clamp the membrane in place without damaging the substrate. Depending on the specific detail, a membrane coverstrip is welded over the Sarnastop for watertightness.

MAINTENANCE

Standard maintenance of Sarnafil® or Sikaplan® systems should include regular inspection of flashings, drains and termination sealants at least twice a year and after each storm.

LOCAL RESTRICTIONS

Note that as a result of specific local regulations the declared data and recommended uses for this product may vary from country to country. Consult the local Product Data Sheet for exact product data and uses.

LEGAL NOTES

The information, and in particular, the recommendations relating to the application and end-use of Sika products, are given in good faith based on Sika's current knowledge and experience of the products when properly stored, handled and applied under normal conditions in accordance with Sika's recommendations. In practice, the differences in materials, substrates and actual site conditions are such that no warranty in respect of merchantability or of fitness for a particular purpose, nor any liability arising out of any legal relationship whatsoever, can be inferred either from this information, or from any recommendations, or from any other advice offered. The information contained herein does not relieve the user of the products from testing them for the intended application and purpose. The proprietary rights of third parties must be observed. All orders are accepted subject to our current terms of sale and delivery. Users must always refer to the most recent issue of the local Product Data Sheet for the product concerned, copies of which will be supplied on request or may be downloaded from our website at: www.sika.ca
