

IT PAYS TO **MANAGE TIME**

EVERY HOUR MATTERS!

Sikalastic®-3900 Traffic Systems are now available with **fast-setting** components that will accommodate a shorter installation window!

NEW FAST-SETTING (FS) COMPONENTS

- **Sikalastic®-120 FS Primer:** quickly seals the concrete substrate and allows the **Sikalastic®-390 Membrane** (elastomeric membrane layer) to be applied the same day.
- **Sikalastic®-220 FS:** Accepts subsequent coats and traffic service in half the time of traditional wear courses and topcoats.

WHAT DOES THIS MEAN?

- Get your garage back in service faster and minimize shutdown costs
- Keep your project on track and on schedule, thanks to FS components

BACK IN SERVICE UNDER 24 HOURS

We offer a wide selection of RAL colours to help you bring parking garage floors to life. Custom colour matching services also available.
