Sika® PowerClean Aid

Cleaning aid for removal of contamination from glass surfaces

Technical Data

Chemical Base	Open-pore, expanded melamine resin
Colour	White
Density	9.5 kg/m ³ approximately
Application Method	With Sika® CleanGlass or Sika® Glass & Surface Cleaner
Shelf Life	36 months

Description

Sika® PowerClean Aid is a chemical-free melamine-foam cleaning aid for use in combination with Sika® CleanGlass or other suitable Sika® liquid glass cleaner. It has been designed to remove contaminants which cannot be adequately removed using liquid glass cleaners. Moreover, while strong enough to remove most types of contaminants, it is gentle enough to do so without scratching glass surfaces. Sika® PowerClean Aid is manufactured in accordance with ISO 9001 Quality Assurance Systems.

Areas of Application

Sika® PowerClean Aid has been designed to remove contaminants on windshields in the Autoglass Replacement market. It is safe for use on both the glass and the ceramic frit. It can be used for removing mould-release agents, silicone residue, adhesive residue and all other types of stubborn dirt.

Method of Application

Use Sika® CleanGlass or equivalent non anti-static glass cleaner to both wet the surface of the glass and to locate contaminants such as mould-release agents, silicone residue, etc. Use one clean Sika® PowerClean aid pad per windshield to gently scrub away the contaminants, paying particular attention to the adhesive bond line. Discard the soiled pad, and allow the surface to dry completely before undertaking the next step in glass surface preparation (i.e. application of Sika® Aktivator-PRO, or Sika® Primer-206 G+P). Before using this product in applications other than autoglass replacement, trials must be carried out to confirm compatibility.

Important Note

Before using Sika® PowerClean Aid on sensitive surfaces (e.g. plastics, vinyl, etc.) use the Sika® PowerClean Aid on a small unobtrusive area to ensure that its use is compatible with the substrate. Consult the Sika Pre-Treatment Chart to determine if further pretreatment is required prior to applying adhesives or sealants.

Further Information

No Material Safety Data Sheet exists for this product, as it does not contain any chemicals.

Packaging

Individual boxes of 24 pads; 64 boxes to a case (1,536 pads).

Value Bases

All technical data stated in this Product Data Sheet are laboratory test-based. Current measured values may vary due to factors beyond our influence.

Health and Safety Information

The Product Data Sheet is available from your local Technical Sales Representative and/or on our website at: www.sika.ca.

Industry

The information, and in particular, the recommendations relating to the application and end-use of Sika products, are given in good faith based on Sika's current knowledge and experience of the products when properly stored, handled and applied under normal conditions, within their shelf life. In practice, the differences in materials, substrates and actual site conditions are such that no warranty in respect of merchantability or of fitness for a particular purpose, nor any liability arising out of any legal relationship whatsoever, can be inferred either from this information, or from any recommendations, or from any other advice offered. The proprietary rights of third parties must be observed. All orders are accepted subject to our current terms of sale and delivery. Users should always refer to the most recent issue of the Product Data Sheet for the product concerned, copies of which will be supplied on request or can be accessed in the Internet under www.sika.ca.
