PROCEDURES

Wet the surface just prior to application. Apply the cleaner with a brush or rag to the soiled area, and allow to stand for 3 to 5 minutes. Do not allow product to dry on the surface. Scrub the area thoroughly with a stiff bristle brush and flush immediately with clean water, until water runs clear without bubbling. Deep oil and grease stains may require multiple applications.

NOTE: Do not allow cleaner to stand on a blacktop surface for a prolonged period of time, as it will soften the asphalt.
