LETTER OF INTENT: SIKA EPD UPDATE PROJECT

Resinous & Cementitious Flooring Systems
Cementitious Solutions for Concrete repair and Maintenance
Concrete Admixtures and Cement Additives

To Whom It May Concern:

The Leadership in Energy and Environmental Design (LEED) program is an internationally recognized green building rating system that encourages buildings that have lower impacts on the environment and offer a healthier space for its occupants. For years, [Sika Canada](#) has been committed to offering products compliant with that flagship program.

In 2019 and 2022, **Environmental Product Declarations (EPDs) covering many of our flooring products, cementitious solutions and concrete admixtures and cement additives** were published. You will find below the updated list of products and systems covered by those 3 EPDs. The project is expected to be completed at the beginning of summer 2025.

Those product-specific type III environmental declarations are compliant with the Materials and Resources credits in LEED®v4 and LEED®v4.1. More specifically, they can contribute to obtaining up to 3 points with the "Building Product Disclosure and Optimization – EPD" credit alone in a LEED® v4 or v4.1 project. Note that LEED®v5 continues to recognize EPDs.

Continuing its journey on the path of sustainability, Sika Canada has retained the services of [Groupe AGÉCO](#), a consulting firm whose corporate responsibility branch is based in Montreal, to update its EPDs.

If further information is required, please feel free to contact me.

Sincerely,

Christophe Culis
