| Engineering measures        | :   | Use of adequate ventilation should be sufficient to control<br>worker exposure to airborne contaminants. If the use of this<br>product generates dust, fumes, gas, vapor or mist, use pro-<br>cess enclosures, local exhaust ventilation or other engineer-<br>ing controls to keep worker exposure below any recommend-<br>ed or statutory limits. |
|-----------------------------|-----|---|
| Personal protective equipme | ent |   |
| Respiratory protection      | :   | Use a properly fitted NIOSH approved air-purifying or air-fed respirator complying with an approved standard if a risk as-<br>sessment indicates this is necessary.   |
|                             |     | The filter class for the respirator must be suitable for the max-<br>imum expected contaminant concentration<br>(gas/vapor/aerosol/particulates) that may arise when han-<br>dling the product. If this concentration is exceeded, self-<br>contained breathing apparatus must be used.   |
| Hand protection             | :   | Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.   |
| Eye protection              | :   | Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary.   |
| Skin and body protection    | :   | Choose body protection in relation to its type, to the concen-<br>tration and amount of dangerous substances, and to the spe-<br>cific work-place.  |
| Hygiene measures            | :   | Avoid contact with skin, eyes and clothing.<br>Wash hands before breaks and immediately after handling<br>the product.<br>Remove contaminated clothing and protective equipment<br>before entering eating areas.<br>Wash thoroughly after handling.   |
