Community Project: Pont Rouge Youth Centre Renovation

Sika Canada inc., in partnership with local businesses, is gearing up for an ambitious community project that will support and strengthen social ties in the beautiful town of Pont Rouge. On August 2, 3 and 4, Sika's volunteer employees will join forces to bring their expertise and skills to this renovation and design project.

Initiative Purpose:

The Youth Centre renovation project will create an inviting, inspiring, and safe space for young people of our community. This establishment is a meeting and sharing space where youths can explore passions, develop skills, and forge lasting friendships. Unfortunately, the Youth Centre needs renovations to continue to offer a positive and stimulating space. This is why Sika and its partners are joining forces to support this project.

The role of Sika and its partners:

As part of this renovation project, Sika and its partners have committed to supplying all the materials required to refurbish the Youth Centre. In addition, our volunteer employees will be joining the construction team to help with the renovation and decoration work. Together, we want to bring our expertise and dedication to create a warm and dynamic space that will stimulate creativity and self-fulfillment of the young people of Pont Rouge.

About Sika:

Sika is a committed company that places great importance in social responsibility. We are proud to contribute to the development of our community and to support local projects that have a positive impact on the lives of residents. The Pont Rouge Youth Centre is a cause close to our hearts and we look forward to working with our partners to bring this ambitious project to fruition.

Together, we join forces to give the young people of Pont Rouge a space where they can grow, share, and learn, and where they can build a promising future.

Our partners:

Sika is proud to count on several partners for this project. Among them, Boulet Dépôt has committed to providing 6000 square feet of grass; Canac will donate 1000 \$ worth of various products; Capital Propane will provide the annual rental and installation on a 400 L propane tank for the symbolic sum of 1\$, for a 10-year period; Poêles et Foyers Portneuf will provide a Weber BBQ; and finally, Conception PMB will donate a basketball hoop.

More about the project:

The plan for this project is to completely redesign the outdoor space, relocating the firewood storage to create a pergola area with a BBQ, swings and more. A dedicated area for educators will be created and grass will be planted throughout the backyard. In addition, minor repairs are planned to a few damaged exterior installations, such as the stairs leading to the backyard.
