

PRODUCT DATA SHEET

Sika® CleanGlass

Water-based contaminant remover, designed for the Auto Glass Replacement market

TYPICAL PRODUCT DATA (FURTHER VALUES SEE SAFETY DATA SHEET)

Chemical base	Water-based containing isopropanol
Colour (CQP001-1)	Light blue, transparent
Application temperature	5 – 40 °C
Application method	Spray and wipe off
Shelf life	60 months

CQP = Corporate Quality Procedure

DESCRIPTION

Sika® CleanGlass is a water-based, alcohol containing, light blue transparent cleaning agent for glass, plastics and non-porous substrates. Sika® CleanGlass can be used for the removal of finger marks, residues and general grime. The product leaves no residue on the surface, thus ensuring easy use and no need to re-polish the glasses.

PRODUCT BENEFITS

- Water-based cleaner
- Makes silicone residues visible
- Can be used on most non-porous substrates

AREAS OF APPLICATION

Sika® CleanGlass is used to clean screen prints on vehicle glasses. In addition it can be used for cleaning purposes on almost all non-porous substrates.

METHOD OF APPLICATION

Apply Sika® CleanGlass on surface and wipe dry with a dry, clean, lint-free towel. Surfaces must be allowed to dry completely prior initiating the next step in surface preparation (e.g. activation or priming).

Sika® CleanGlass concentrate needs to be diluted with deionized water. The mixing ratio is 1:4. Consequently, 5 L of concentrate need to be diluted with 20 L of deionized water.

IMPORTANT NOTE

Before applying Sika® CleanGlass to sensitive surfaces (e.g. plastic, paints, etc.), we recommend to test Sika® CleanGlass on a small, possibly non-visible area of the base material. Consider that before application of the adhesive or sealant, the surface may need to be prepared accordingly.

BASIS OF PRODUCT DATA

All technical data stated in this document are based on laboratory tests. Actual measured data may vary due to circumstances beyond our control.

HEALTH AND SAFETY INFORMATION

User must read the most recent corresponding Safety Data Sheets (SDS) before using any products. The SDS provides information and advice on the safe handling, storage and disposal of chemical products and contains physical, ecological, toxicological and other safety-related data.

DISCLAIMER

The information, and in particular, the recommendations relating to the application and end-use of Sika products, are given in good faith based on Sika's current knowledge and experience of the products when properly stored, handled and applied under normal conditions in accordance with Sika's recommendations. In practice, the differences in materials, substrates and actual site conditions are such that no warranty in respect of merchantability or of fitness for a particular purpose, nor any liability arising out of any legal relationship whatsoever, can be inferred either from this information, or from any recommendations, or from any other advice offered. The information contained herein does not relieve the user of the products from testing them for the intended application and purpose. The proprietary rights of third parties must be observed.
