

# Sikaplan® ADHERED

## COST-COMPETITIVE ROOF MEMBRANE FROM LEADER IN VINYL ROOFING

Sikaplan® is a single ply PVC roofing membrane designed for low-slope roofing applications. The membrane has an internal glass mat reinforcement to provide the dimensional stability adhered roof systems require.

Sikaplan® is ideally suited for applications that call for a quality, cost-efficient roofing membrane from a trusted supplier. The product has a successful track record of more than 20 years on buildings throughout the world.

The economical Sikaplan® Adhered membrane, when used in combination with Sikaplan® Water-Based Membrane Adhesive, is a very attractive, cost-effective option for building owners. This water-based adhesive lowers costs by minimizing material usage through the use of recommended application methods, and by facilitating faster applications.

Sikaplan® Adhered is available in EnergySmart white, which meets the cool roofing requirements of USGBC's LEED® program, Green Globes® and California Title 24.

Like all Sika membranes, Sikaplan® is thermoplastic; allowing seams and flashings to be hot-air welded using the Sarnamatic automatic hot-air welder. When welded together, the sheets of membrane become one monolithic layer of material impervious to water and moisture infiltration.

Sikaplan® ADHERED PRODUCT SPECIFICATIONS	
Colour	EnergySmart Roof White
Systems	Mechanically-attached and RhinoBond®
Thickness	Available in 60 mil nominal
Roll Size 60 mil	1.5 m x 30 m (5 ft x 100 ft) and 3 m x 30 m (10 ft x 100 ft)
Reflectivity	0.85
Emissivity	0.89
SRI	107
