

Sikaplan® FASTENED

COST-COMPETITIVE ROOF MEMBRANE FROM LEADER IN VINYL ROOFING

Sikaplan® is a single ply PVC roofing membrane designed for low-slope and steep-slope roofing applications. The membrane has an internal polyester scrim reinforcement to provide the tear resistance required for mechanically-attached roof systems.

Sikaplan® is ideally suited for applications that require a quality, cost-effective roofing membrane from a trusted supplier. The product has a successful track record of more than 20 years on buildings throughout the world.

This economical membrane is available in EnergySmart white and with and without a felt backing. EnergySmart white membranes meet the cool roofing requirements of USGBC's LEED® program, Green Globes® and California Title 24.

Like all Sika membranes, Sikaplan® is thermoplastic; allowing seams and flashings to be hot-air welded using the Sarnamatic automatic hot-air welder. When welded together, the sheets of membrane become one monolithic layer of material impervious to water and moisture infiltration.

Sikaplan® PRODUCT SPECIFICATIONS

Colour	EnergySmart White
Systems	Mechanically-attached and RhinoBond®
Thickness	Available in 60 mil nominal
Roll Size 60 mil	1.5 m x 30 m (5 ft. x 100 ft.) and 3 m x 30 m (10 ft. x 100 ft.)
Reflectivity	0.85
Emissivity	0.89
SRI	107
