This colour chart shows the colours available for the paints and stains of the SikaWall® range. These samples are as close as possible to the actual colour. It is also possible to reproduce colours from different manufacturers. However, due to the printing process, on-screen appearance, lighting, varnish and size of the surface to be coated, the colour may vary slightly from the actual product colour. We recommend to carry out a test before applying a large surface.

Ce nuancier présente les couleurs disponibles pour les peintures et lasures de la gamme SikaWall®. Ces échantillons sont aussi proches que possible de la couleur réelle. Il est également possible de reproduire des couleurs provenant de différents fabricants. Toutefois, en raison du processus d'impression, de l'aspect à l'écran, de l'éclairage, du vernis et de la taille de la surface à recouvrir, la couleur peut varier légèrement par rapport à la couleur réelle du produit. Nous recommandons d'effectuer un essai avant d'appliquer une grande surface.
