

# Sika® FerroGard®-903+

## THE SOLUTION FOR PROTECTING REINFORCED CONCRETE AGAINST CORROSION

**Sika® FerroGard®-903+** is a corrosion inhibitor specially formulated as an impregnation to penetrate the surface of concrete structures and migrate to rebars and embedded metal for protection.

### ADVANTAGES

- Water-based solution, easy to handle and apply
- Improves the durability of reinforced concrete
- Can be applied to reinforced concrete structures already showing signs of corrosion

### WHERE TO USE

- On pre-stressed, pre-cast, post-tensioned or site-formed reinforced concrete
- Reinforced concrete parking decks, pavements and road infrastructure
- Piers, piles, docks and other concrete structures in harbours/maritime environments

### THE SIKA ADVANTAGE

Sika offers you a complete range of concrete protection and repair solutions, always supported by a team of experts!
