

FOR ALL OF YOUR WALL COVERING NEEDS: Choose Sikagard® Duroplast System

THE SYSTEM

Sikagard® Duroplast is a CFIA*-accepted, **epoxy-based wall coating system** for **indoor applications**. It is available in **custom colours** and contains Steri-Septic, an **antimicrobial and antifungal** additive. **Sikagard® Duroplast** is ideal for **high performance** and **aesthetic** wall coverings in healthcare facilities, schools, kitchens, locker rooms, laundry rooms and much more.

THE PRODUCTS

THE PRIMERS

Sikagard® Duroplast EE

- For concrete masonry units and cast-in-place concrete substrates
- Easy mixing ratio (1:1)
- Clean-up with water

Sikagard® Duroplast PS

- For gypsum and plaster substrates
- Single-component, ready-to-use
- Clean-up with water

THE COATINGS

Sikagard® Duroplast 100

- Coverage: 5 to 7 m²/L
- Shock-resistant (may be reinforced with glass fibre)
- Ideal for healthcare facilities and other institutional buildings

Sikagard® Duroplast 150

- Coverage: 13 to 20 m²/L
- Water-based
- Excellent colour retention

Sika's Advice: Apply a top coat of Sikagard® Duroplast 150 over Sikagard® Duroplast 100 in order to preserve its colour over time.
