## SAKRETE JOINTING SAND

.....

SAKRETE Jointing Sand is a graded, washed, flame dried sand with a unique granular structure. The irregular shapes of the aggregates allow the sand to provide better stability than silica sand, and allow the sand to resist washout. This product fills voids easily.

### USES

For filling joints between interlocking pavers, stone, bricks, and slabs.

### PROCEDURES

1. Pour on to surface as required and sweep over joints using a broom, until all joints are filled.
2. Sweep off excess.
3. Lightly mist with water.

### YIELD

25 KG (55 lb) yields approximately 4.6 m<sup>2</sup> (50 ft<sup>2</sup>) to 9.3 m<sup>2</sup> (100 ft<sup>2</sup>) depending on size of interlocking pavers, stone, bricks or slab, as well as depth of joint and level of compaction.

### PACKAGING

25 KG (55 lb) bag

### UPC

055226030256

### STORAGE & SHELF LIFE

Material should be stored in a dry, covered area, protected from the elements.

### SAFETY PROCEDURES

Do not swallow. Do not get in eyes.

**FIRST AID TREATMENT:** If in eyes, rinse with water.
