

# ENHANCE DURABILITY, REDUCE COSTS:

SMART WATERPROOFING FOR STRONGER AND MORE EFFICIENT CONCRETE.

Crack sealed with  
SikaControl®-245 WT Liquid

Result after 1 week

(Images shown at 50x magnification)

**SikaControl®-245 WT Liquid is a liquid capillary waterproofing admixture designed for producing watertight concrete. A new addition to Sika's White Box concept for structural waterproofing. SikaControl®-245 WT Liquid reacts upon contact with moisture in hardened concrete, gradually densifying the cement matrix. It ensures consistent waterproofing and improves the durability of structures.**

## KEY BENEFITS

- Long-lasting waterproofing: Reduces concrete permeability and ensures long-term watertightness.
- Capable of sealing cracks up to 0.40 mm, thus enhancing the structural integrity of the concrete.
- Cost savings: Potential to eliminate the need for additional waterproofing barriers, depending on hydraulic pressure.

## APPLICATION FIELDS

- Industrial infrastructure (tunnels, bridges, dams, reservoirs)
- Commercial buildings (shopping malls, libraries, parking structures)
- Residential (foundations, basements, swimming pools)
